

Hi,
I'm Kaustubh, a **Product Designer**.

I graduated from IISc Bangalore in 2021 and have been working with startups since.

My goal is to help people build functionally sound and *aesthetically pleasing* delightful products!

Here is a collection of my recent projects

Work for Cimple

ID to Engg

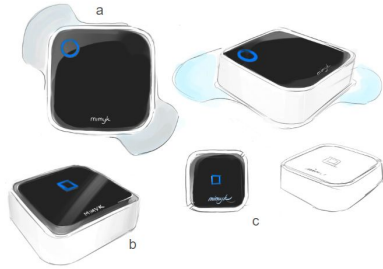

Worked on the ID, and Engineering of a Timer Plug. A device that operates high voltage consumer appliances.

(design freeze and final prototype in progress as of Aug '26)

Work at **Mimy**k

Sketch to Proto

Sketch

Render

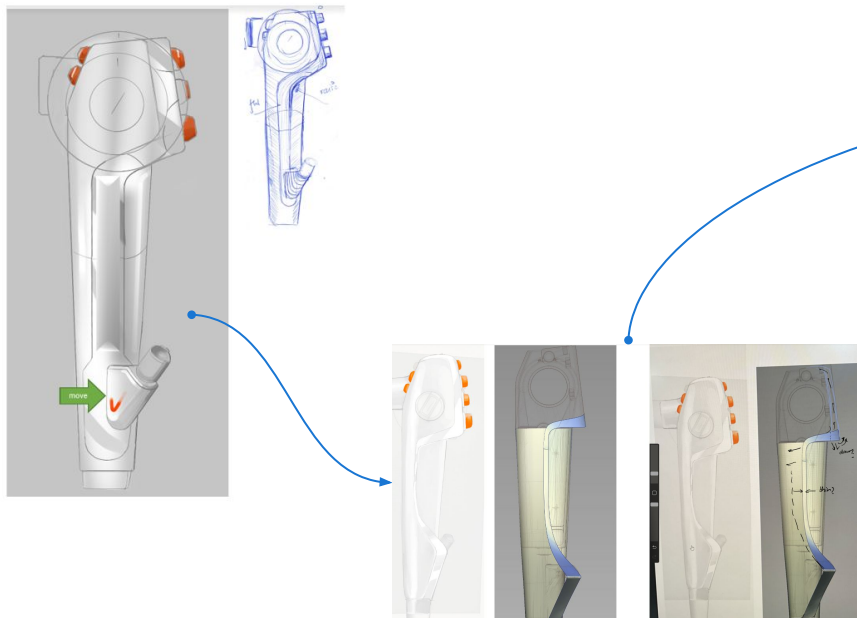

Real

A continuous monitoring vitals patch & a novel drug delivery device, with a app based health monitoring platform.

I developed the Industrial design as well as the internal working principle and prototype of the devices.

I also guided the development of the app.

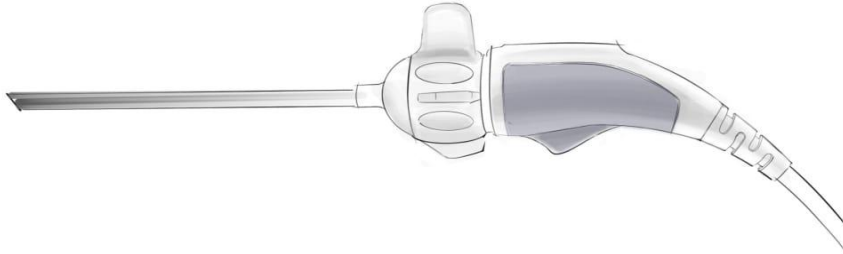

Sketch to Proto

A single use flexible endoscope prototype - from sketch to electronics packaging and EVT.

Enclosure design for ergonomics

Casing design of a rigid endoscope preserving industrial design intent, ergonomics and IP22 mandate.

Freelance Work for
Indra Water Systems

Industrial Design

Hand Render

CAD Render

Old vs New

Sheet metal enclosure and industrial design according to brand identity while preserving ease of manufacturing

Product Design Projects

Product Design
Premium-Lemon-Squeezer

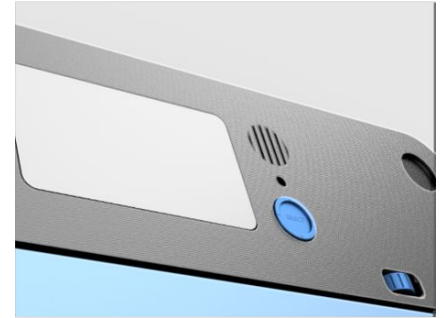

[\(click to know more\)](#)

SQZR
Twist. Go.

Industrial design, mechanism design and prototyping of new kind of Lemon Squeezer for fitness enthusiasts who have less time in their hands daily.

Design to Engineering

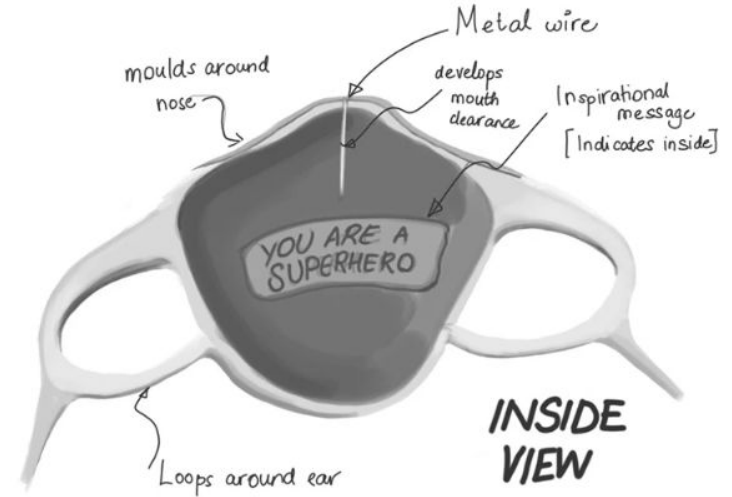

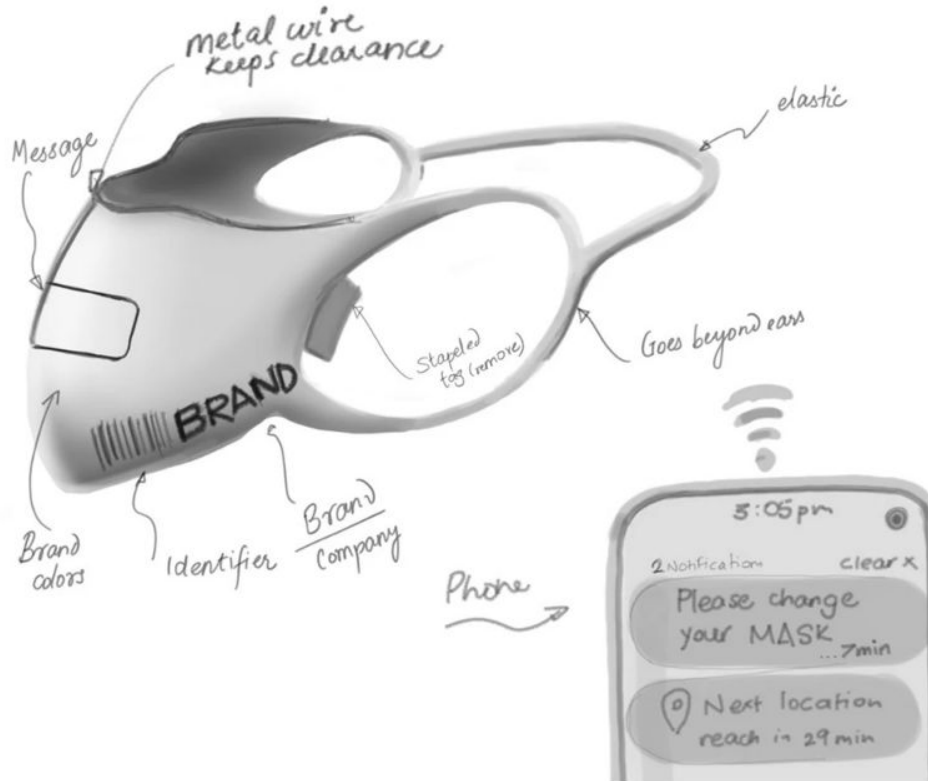

Masters thesis project - to design and develop a product and business case around it.
This product is an affordable, portable, versatile hand force plate designed to gather data from ergonomics lab experiments aiding researchers make design decisions, fast.

Business + Product Design

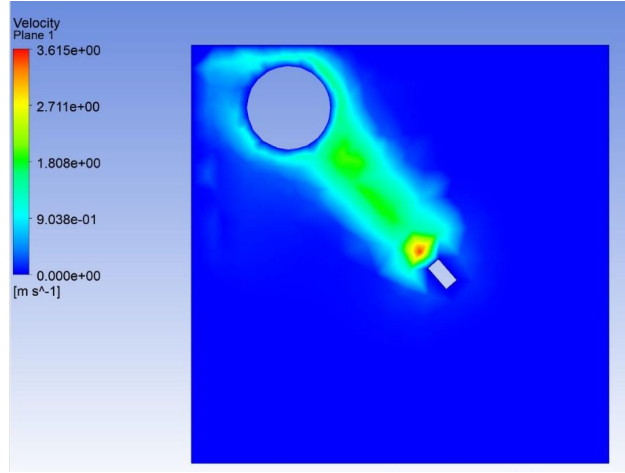

CoVID19-Mask

[\(click to know more\)](#)

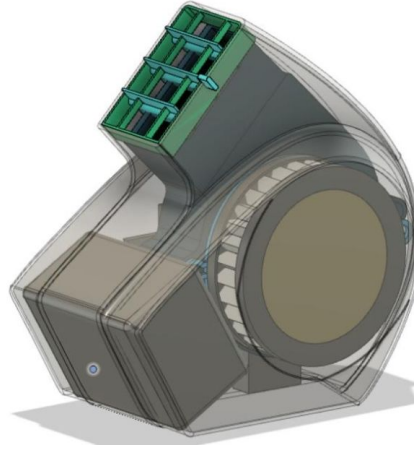

Design of Product & business together.
Covers user study, ID, ME, Process and
overall a business blueprint.

Design to Proto - Personal Air Purifier

Simulations

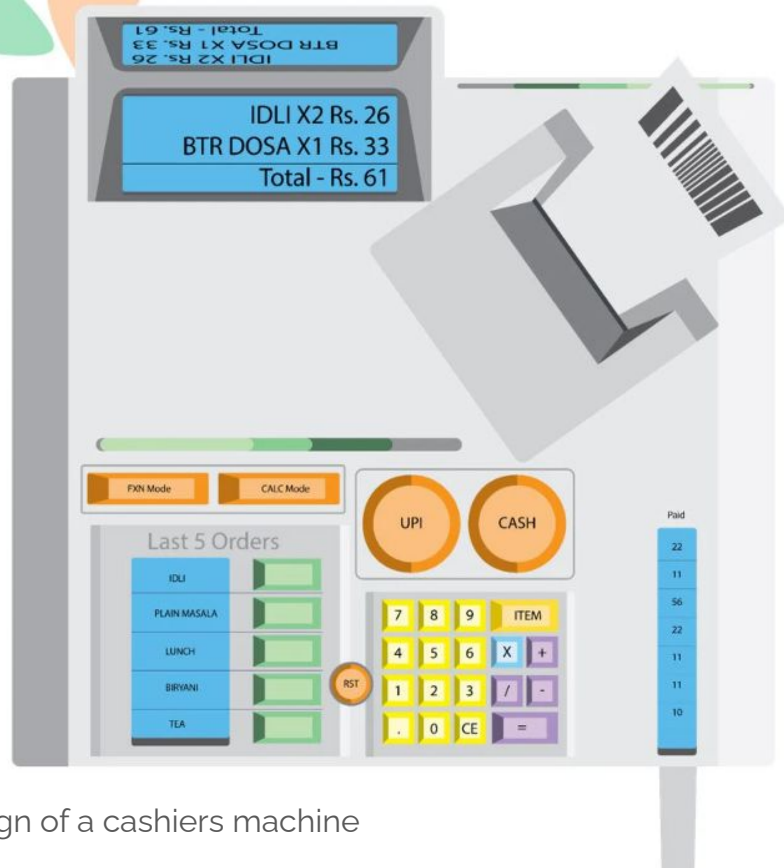

CAD

Real

Mech Design, Fluent Simulations and a working prototype of a personal air purifier which purifies the air around a person's region of breathing

Solving Physical UX ([click to know more](#))

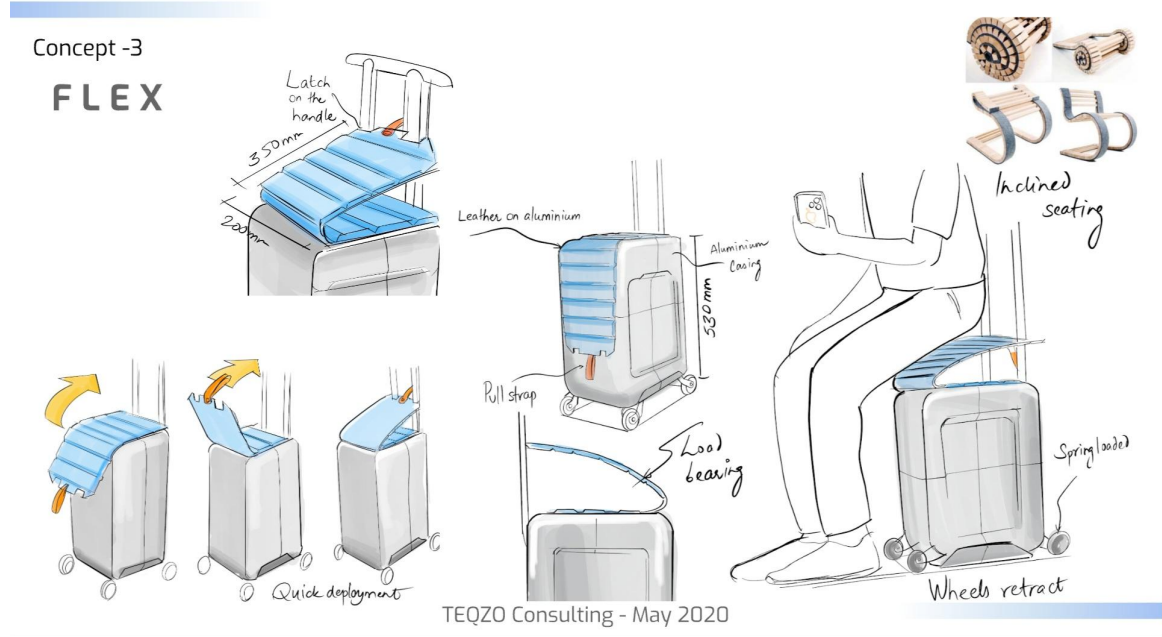

- **Less** number of **buttons**
 - Removed unused
 - Combined functionality
- Added **progress-bar**
- Added calculator
- Programming/Function Mode will be **turned on and used**
- Tearing bill made easy
- Main functional buttons grouped
- Flow-wise grouping of buttons
- Added recent orders
- Automatically generates a sales value print

UX redesign of a cashiers machine

Projects during internship

A Baby activity logger

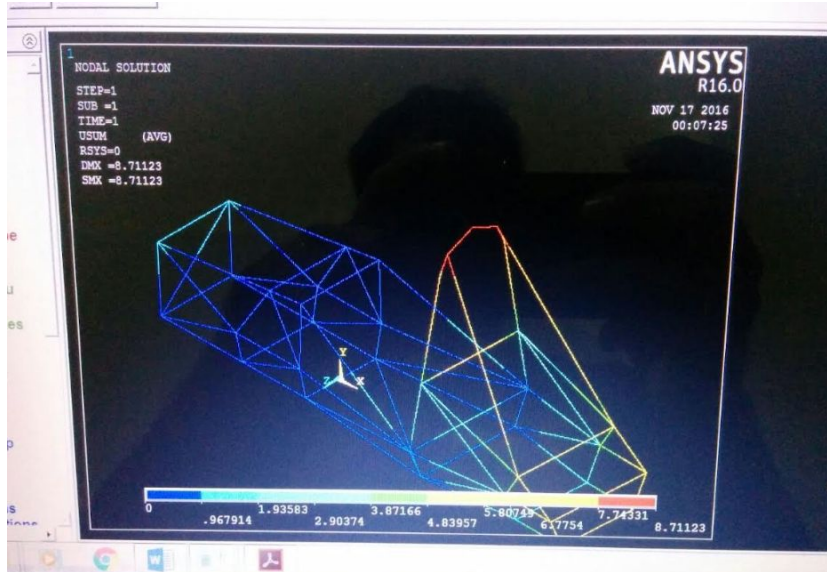

Industrial design concept for a luggage bag that allows sitting

Industrial Design, Concept Design, Plastic design, DFM, DFA

Formula Student & Engineering

Design to Manufacturing FS Vehicle

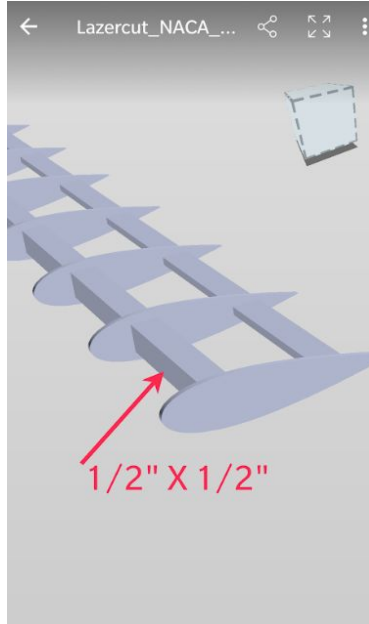

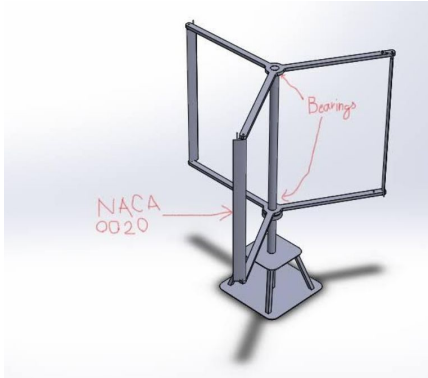

Ansyes APDL

Real

Design to Proto - VAWT

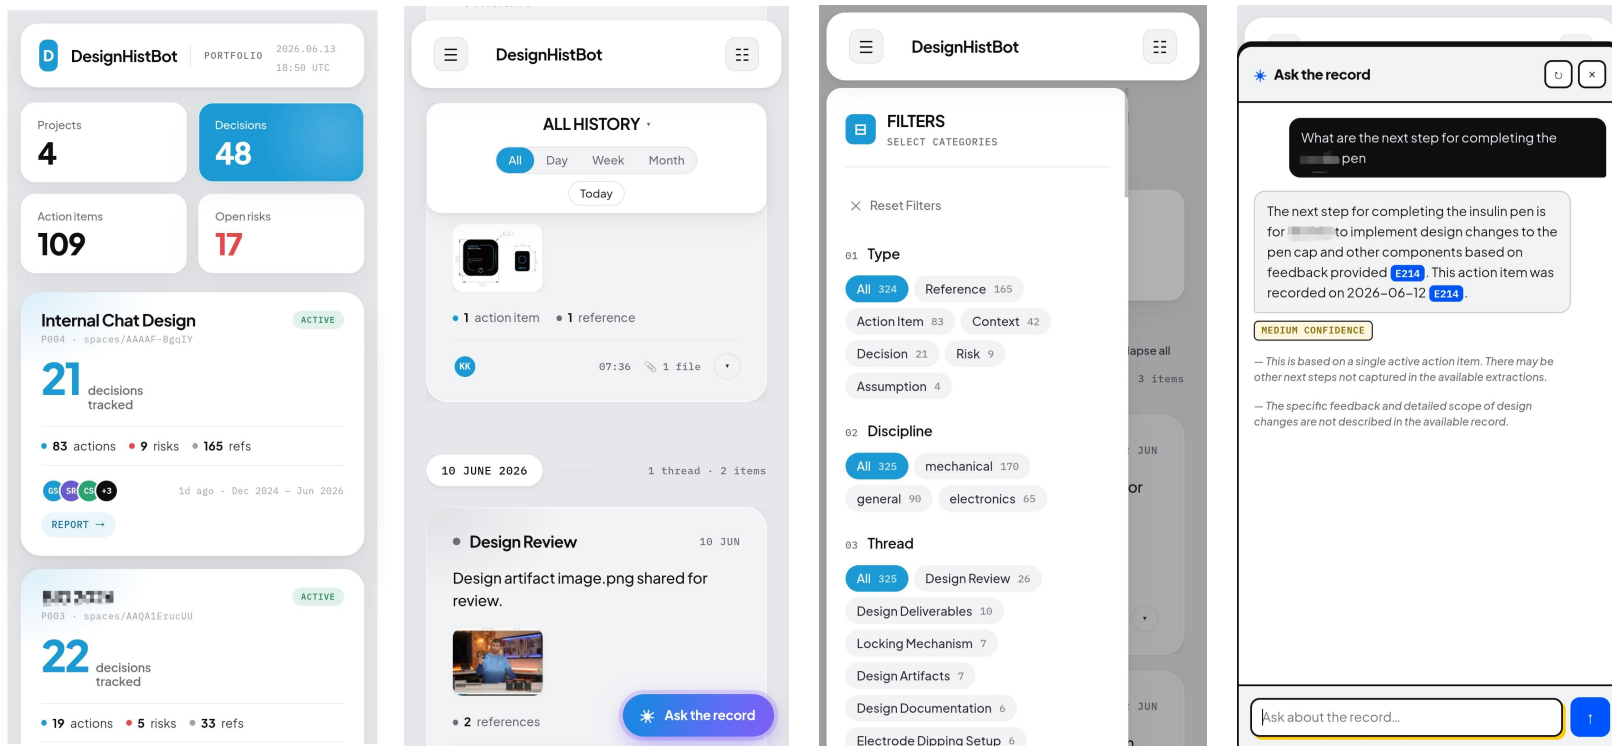

CAD

Real

Other stints

Design History Capture Tool for Hardware Teams

Designed and engineered a Design History capture tool that works in Chat platforms and builds project history
